**1. Permits, Change, Transfer, Renewal, Sale**

I inspected the surface facilities maps during the inspection. The permittee needs to update the surface facilities map in the Mining and Reclamation Plan. The map shows a building apart of the water tank but on the ground check shows a separation. There is a separate building next to the bathhouse but the map shows it was one building.

**3. Topsoil**

The permittee is in the process of moving the topsoil at the refuse pile to a new approved area next to the road.

**4.a Hydrologic Balance: Diversions**

The diversions were spot-checked and would function during a storm event.

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

The sediment pond was spot-checked and no hazardous conditions were noticed during the inspection.

**5. Explosives**

The explosives boxes are within the disturb area.

**8. Noncoal Waste**

The mine site was clear of non-coal waste materials.

**18. Support Facilities, Utility Installations**

There were no new construction of facilities at the mine site.
